 - Rock & Roll - Pop - Disco or Folk music
- 2- Is there a preference for a**
 - Singer - Band - Group
 - Orchestra - Composer - Artist
- 3- Has the person a preference for a musical instrument ?**

Piano - violin - bagpipe - accordion - harmonica, etc ...
- 4- What is the first music the person has bought ?**

Look between the old records, cd's and cassettes.
- 5- Has the person favorite movies or tv programs ?**

Think about opening tunes and film music.
- 6- Is there a favourite comedian or humorist ?**
- 7- Are there songs which belong to special events ?**
- 8- Does the person sings during work, washing the dishes or under the shower ?**

If so, find the lyrics from those songs, and sing along.
- 9- Think about Christmas songs and other festival songs**

These songs are deeply stored in the brain, search for those songs, many are released on cd.
- 10- Are there songs in regional dialect or songs belonging to the person's hometown ?**
- 11- Religious music has often a special value for someone with azheimer even if it's long ago that the person has gone to church**
 - Did the person go to church ?
 - To which religion community ?
 - Which music was played or sung there in the 15-25 period (see below)
- 12- Has the person danced or taken dancing lessons in his youth ?**

Yes? Then search for dance music from that time and try while listening to that music if the person likes to dance again. If so, you have an exercise that gives plesure for two.
- 13- Did the person visit theaters, musicals or concerts ?**

If yes, try to find the associated music.

14- Does or did the person play a musical instrument ?

When someone with dementia plays or has played an instrument, encourage this to continue or to pick it up again. Musical skills are very deeply rooted in the brain and remain available.

15- Did the person listen to radio ?

- Which radio station ?
- To which radio show ?
- Think about the “radio plays” from those days

16- Does or did the person sing in a choir ? Which songs sings this choir ?

Are there recordings of this? If yes, use these recordings or try to find choral music which sounds like these. When someone with dementia has sung in the past or still sings, encourage to continue this or to pick it up again.

17- Was there music in the childhood home ?

What music was listened to? Which songs were sung? Did they play an instrument at home ?

18- Did the person play in a band or orchestra ? What kind of music did they play ?

Are there recordings of this? If yes, use these recordings or try to find similar music. While listening to that music try if the person wants to play that instrument again.

Calculate the 15-25 period

The year of birth _____

Add 10 years to the year of birth _____

Add 25 years to the year of birth _____

The 15-25 period is between the two dates

Search for songs which were popular in this period

Why the 15-25 period ?

Because it is proven that the music heard between the “ages of 15-25” is the most deeply rooted music in our brain. These songs can serve as keys for unlocking whole worlds of long forgotten memories.

On MusicShelter.info

The 15-25 rule is further explained and also how to make Care Oriented Playlists which makes caring for someone with dementia easier.

Succes with Searching & Finding the right music, which is the greatest gift you can give to someone with dementia
